

# SmartHealth AI Skin Screening Report

## Report Information

|            |                                      |
|------------|--------------------------------------|
| Report ID: | 45623113-d11f-49ac-a944-aeed9056d806 |
| Date/Time: | 2026-08-25T10:24:46.971203           |
| User ID:   | mahsa arj                            |

## Patient/User Information

|            |               |
|------------|---------------|
| Age:       | 22            |
| Skin Type: | oily          |
| Allergies: | l, a, t, e, x |

## AI Model Information

|                   |                                                                                               |
|-------------------|-----------------------------------------------------------------------------------------------|
| Model Name:       | PanDerm                                                                                       |
| Predicted Class:  | melanocytic nevus                                                                             |
| Model Confidence: | 61.58%                                                                                        |
| IMPORTANT:        | This confidence score represents the model's certainty in its prediction, NOT the probability |

## Top 3 Predictions

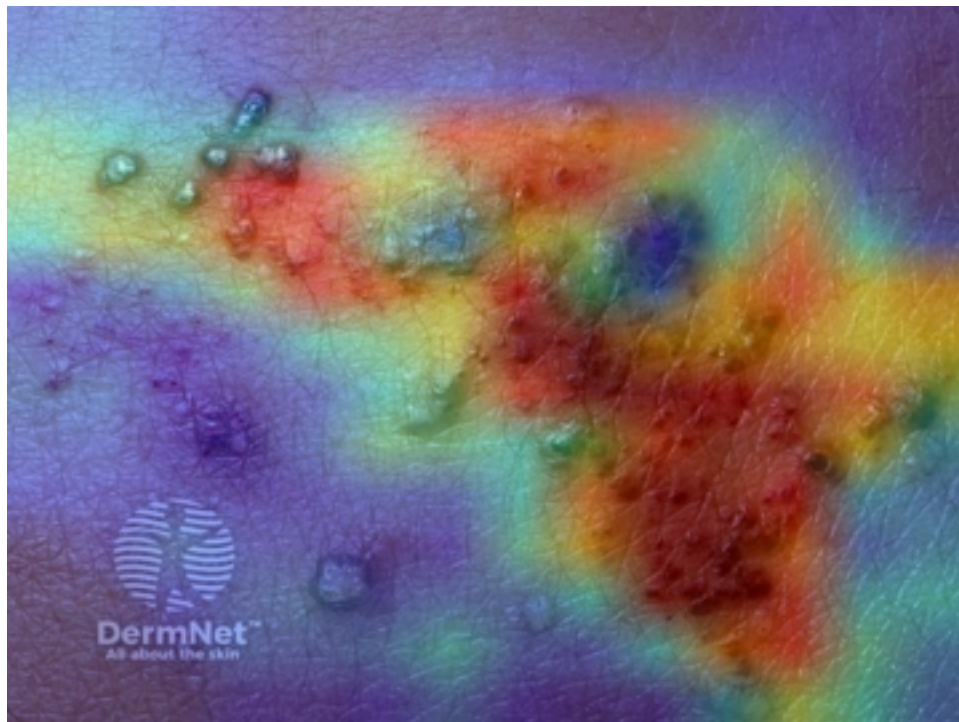

| Rank | Class             | Probability |
|------|-------------------|-------------|
| 1.   | melanocytic nevus | 61.58%      |
| 2.   | melanoma          | 17.19%      |

3. benign keratosis 11.88%

## All Model Probabilities

| Class                   | Probability |
|-------------------------|-------------|
| melanocytic nevus       | 61.58%      |
| melanoma                | 17.19%      |
| benign keratosis        | 11.88%      |
| basal cell carcinoma    | 2.72%       |
| squamous cell carcinoma | 2.34%       |
| actinic keratosis       | 1.48%       |
| vascular lesion         | 1.42%       |
| dermatofibroma          | 1.38%       |

## Explainability Visualization

Explainability Disclaimer: The heatmap is an AI explainability visualization showing image regions that contributed more strongly to the model prediction. It is not a clinically validated localization of cancer and should not be interpreted as a diagnostic finding.

## User Symptoms

- Analyze this image

## Risk Assessment

AI Screening Indicator: low

Screening Score: 6/100

Urgency: Routine skin check recommended; monitor for ABCDE changes

**IMPORTANT:** This is an AI-generated screening indicator, NOT a clinically validated cancer-risk score.

## ABCDE Assessment

ABCDE Assessment: Not reliably assessed by the current automated analysis.

ABCDE criteria should be evaluated by a dermatologist during clinical examination.

## Image Quality Assessment

Image Quality: Acceptable for analysis

## Recommended Next Steps

- timeframe: At next routine checkup or annual skin exam
- specialist: Primary care or dermatologist
- visit\_type: Preventive skin screening
- bring: []
- questions: ['How often should I have skin checks?', 'What sun protection do you recommend for my skin type?']

## Medical Disclaimer

This AI screening is for educational purposes only and is NOT a medical diagnosis.  
Only a board-certified dermatologist can diagnose skin cancer through clinical examination and biopsy.  
When in doubt, always seek professional care.
