

SmartHealth AI Skin Screening Report

Report Information

Report ID:	b00a6061-04dd-4ddb-9465-3789c2a7e900
Date/Time:	2026-08-23T11:50:24.290146
User ID:	mahsa arj

Patient/User Information

Age:	22
Skin Type:	oily
Allergies:	l, a, t, e, x

AI Model Information

Model Name:	PanDerm
Predicted Class:	melanoma
Model Confidence:	63.90%
IMPORTANT:	This confidence score represents the model's certainty in its prediction, NOT the probability

Top 3 Predictions

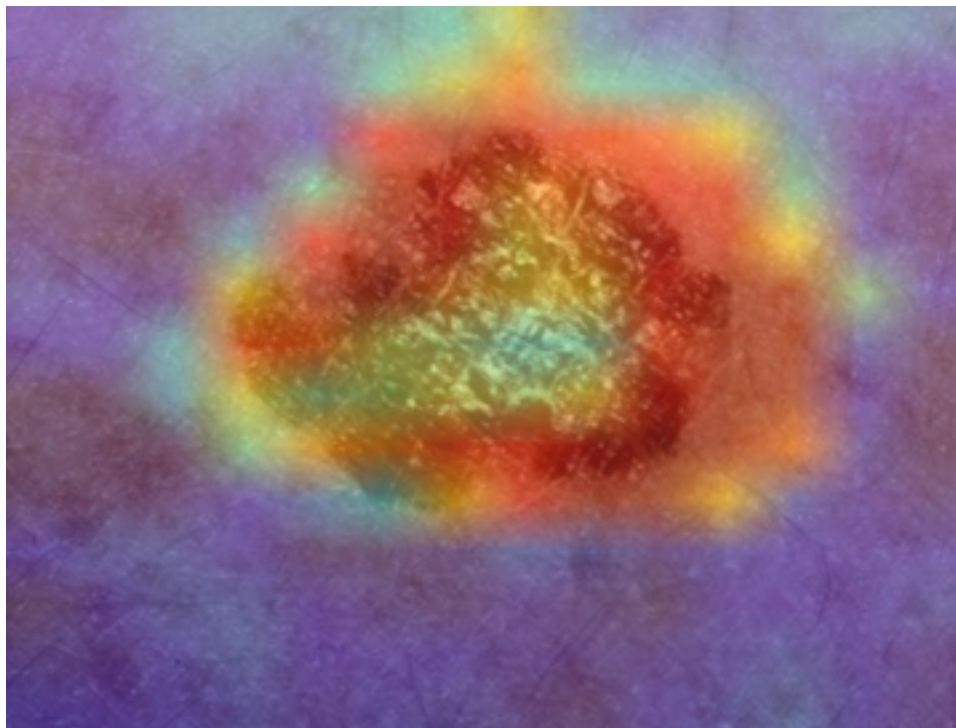

Rank	Class	Probability
1.	melanoma	63.90%
2.	basal cell carcinoma	21.81%

3. melanocytic nevus 4.60%

All Model Probabilities

Class	Probability
melanoma	63.90%
basal cell carcinoma	21.81%
melanocytic nevus	4.60%
benign keratosis	3.77%
squamous cell carcinoma	1.83%
dermatofibroma	1.77%
vascular lesion	1.18%
actinic keratosis	1.14%

Explainability Visualization

Explainability Disclaimer: The heatmap is an AI explainability visualization showing image regions that contributed more strongly to the model prediction. It is not a clinically validated localization of cancer and should not be interpreted as a diagnostic finding.

User Symptoms

- ██████ ██████ ██████

Risk Assessment

AI Screening Indicator:	high
Screening Score:	33/100
Urgency:	Schedule a dermatologist appointment within 2-4 weeks
IMPORTANT:	This is an AI-generated screening indicator, NOT a clinically validated cancer-risk score.

ABCDE Assessment

ABCDE Assessment: Not reliably assessed by the current automated analysis.
ABCDE criteria should be evaluated by a dermatologist during clinical examination.

Image Quality Assessment

Image Quality: Acceptable for analysis

Recommended Next Steps

- timeframe: Within 2-4 weeks
- specialist: Dermatologist
- visit_type: Skin lesion evaluation
- bring: ['Photos of the lesion', 'Medication/allergy list']
- questions: ['Is this lesion cancerous or precancerous?', 'What diagnostic tests are needed?', 'What are my treatment options?']

Medical Disclaimer

This AI screening is for educational purposes only and is NOT a medical diagnosis.

Only a board-certified dermatologist can diagnose skin cancer through clinical examination and biopsy.

When in doubt, always seek professional care.
