

# SmartHealth AI Skin Screening Report

## Report Information

|            |                                      |
|------------|--------------------------------------|
| Report ID: | d3031af6-7dbf-48a9-af14-2e9f3fa20061 |
| Date/Time: | 2026-08-20T12:58:00.555415           |
| User ID:   | mahsa arj                            |

## Patient/User Information

|            |       |
|------------|-------|
| Age:       | 22    |
| Skin Type: | oily  |
| Allergies: | latex |

## AI Model Information

|                   |                                                                                                      |
|-------------------|------------------------------------------------------------------------------------------------------|
| Model Name:       | PanDerm                                                                                              |
| Predicted Class:  | basal cell carcinoma                                                                                 |
| Model Confidence: | 0.86%                                                                                                |
| <b>IMPORTANT:</b> | <b>This confidence score represents the model's certainty in its prediction, NOT the probability</b> |

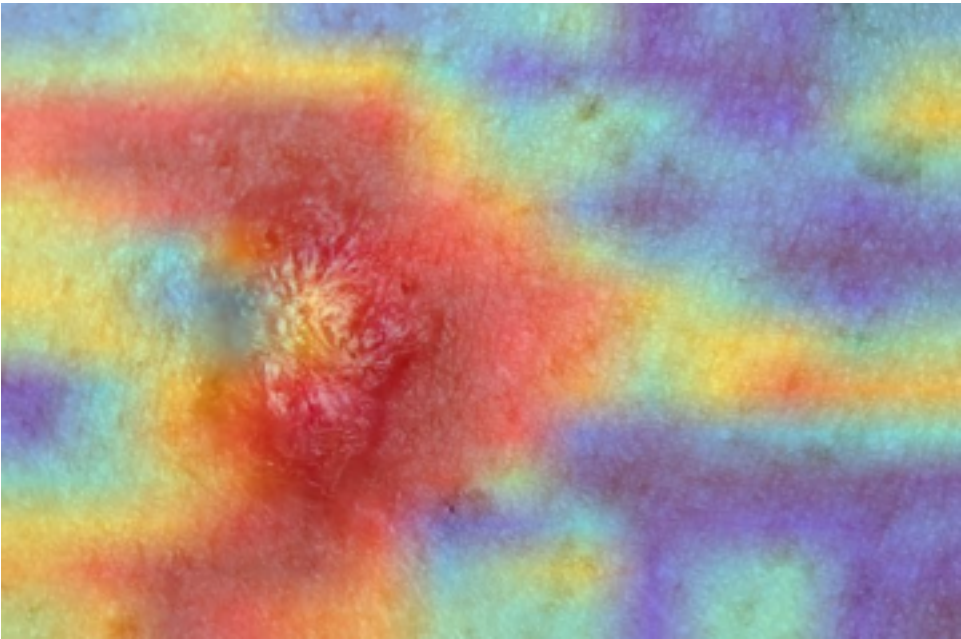

## Top 3 Predictions

| Rank | Class                | Probability |
|------|----------------------|-------------|
| 1    | basal cell carcinoma | 0.86%       |
| 2    | melanocytic nevus    | 0.03%       |

All Model Probabilities

| Class                   | Probability |
|-------------------------|-------------|
| basal cell carcinoma    | 0.86%       |
| melanocytic nevus       | 0.03%       |
| dermatofibroma          | 0.02%       |
| vascular lesion         | 0.02%       |
| melanoma                | 0.02%       |
| squamous cell carcinoma | 0.01%       |
| actinic keratosis       | 0.01%       |
| benign keratosis        | 0.01%       |

Explainability Visualization

Explainability Disclaimer: The heatmap is an AI explainability visualization showing image regions that contributed more strongly to the model prediction. It is not a clinically validated localization of cancer and should not be interpreted as a diagnostic finding.

## User Symptoms

- [REDACTED]

## Risk Assessment

|                         |                                                                                            |
|-------------------------|--------------------------------------------------------------------------------------------|
| AI Screening Indicator: | urgent                                                                                     |
| Screening Score:        | 37/100                                                                                     |
| Urgency:                | See a dermatologist within 1-2 weeks (sooner if lesion is changing)                        |
| IMPORTANT:              | This is an AI-generated screening indicator, NOT a clinically validated cancer-risk score. |

## ABCDE Assessment

ABCDE Assessment: Not reliably assessed by the current automated analysis.  
ABCDE criteria should be evaluated by a dermatologist during clinical examination.

## Image Quality Assessment

Image Quality: Acceptable for analysis

## Recommended Next Steps

- timeframe: Within 1-2 weeks (sooner if rapidly changing)
- specialist: Board-certified dermatologist
- visit\_type: Urgent skin cancer screening
- bring: ['Clear photos of the lesion (with dates if available)', 'List of medications and allergies', 'Family history of skin cancer', 'ABCDE symptom notes']
- questions: ['Could this be melanoma or another skin cancer?', 'Do I need a biopsy?', 'How urgently should this be treated?', 'What follow-up schedule do you recommend?']

## Medical Disclaimer

This AI screening is for educational purposes only and is NOT a medical diagnosis.

Only a board-certified dermatologist can diagnose skin cancer through clinical examination and biopsy.

When in doubt, always seek professional care.
