

# SmartHealth AI Skin Screening Report

## Report Information

|            |                                      |
|------------|--------------------------------------|
| Report ID: | faff16d4-29ff-426b-9893-823713e90184 |
| Date/Time: | 2026-08-13T12:28:37.907115           |
| User ID:   | mahsa arj                            |

## Patient/User Information

|            |       |
|------------|-------|
| Age:       | 22    |
| Skin Type: | oily  |
| Allergies: | latex |

## AI Model Information

|                   |                                                                                               |
|-------------------|-----------------------------------------------------------------------------------------------|
| Model Name:       | PanDerm                                                                                       |
| Predicted Class:  | vascular lesion                                                                               |
| Model Confidence: | 72.44%                                                                                        |
| IMPORTANT:        | This confidence score represents the model's certainty in its prediction, NOT the probability |

## Top 3 Predictions

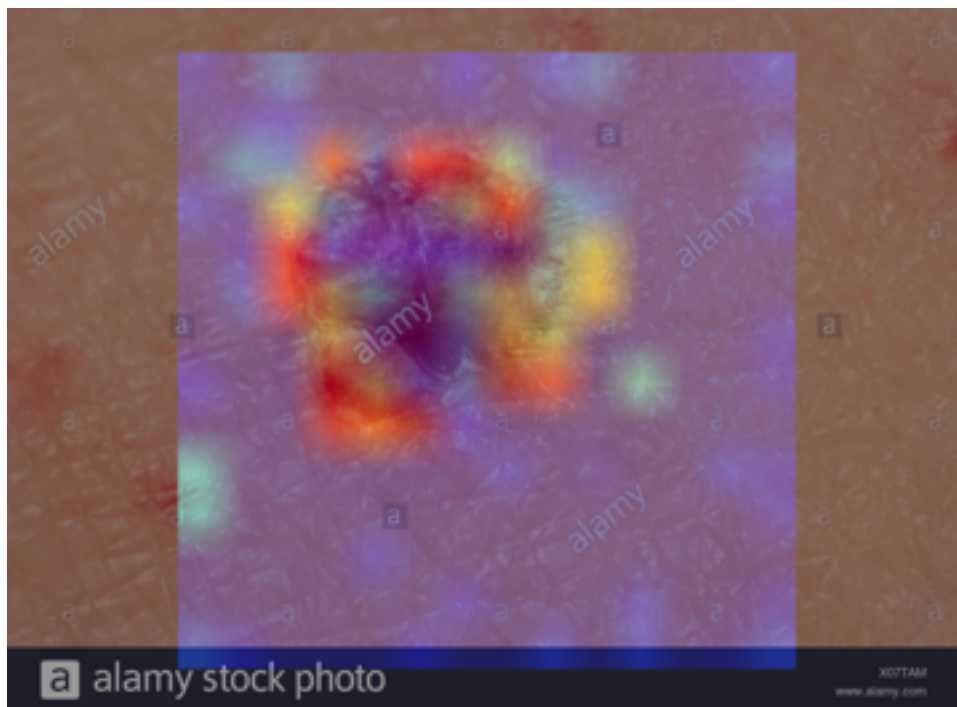

| Rank | Class           | Probability |
|------|-----------------|-------------|
| 1.   | vascular lesion | 72.44%      |
| 2.   | melanoma        | 10.79%      |

3. squamous cell carcinoma 8.47%

## All Model Probabilities

| Class                   | Probability |
|-------------------------|-------------|
| vascular lesion         | 72.44%      |
| melanoma                | 10.79%      |
| squamous cell carcinoma | 8.47%       |
| melanocytic nevus       | 3.62%       |
| basal cell carcinoma    | 1.60%       |
| actinic keratosis       | 1.16%       |
| benign keratosis        | 0.99%       |
| dermatofibroma          | 0.93%       |

## Explainability Visualization

Explainability Disclaimer: The heatmap is an AI explainability visualization showing image regions that contributed more strongly to the model prediction. It is not a clinically validated localization of cancer and should not be interpreted as a diagnostic finding.

## Risk Assessment

|                         |                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------|
| AI Screening Indicator: | low                                                                                               |
| Screening Score:        | 7/100                                                                                             |
| Urgency:                | Routine skin check recommended; monitor for ABCDE changes                                         |
| <b>IMPORTANT:</b>       | <b>This is an AI-generated screening indicator, NOT a clinically validated cancer-risk score.</b> |

## ABCDE Assessment

ABCDE Assessment: Not reliably assessed by the current automated analysis.  
ABCDE criteria should be evaluated by a dermatologist during clinical examination.

## Image Quality Assessment

Image Quality: Acceptable for analysis

## Recommended Next Steps

- timeframe: At next routine checkup or annual skin exam
- specialist: Primary care or dermatologist
- visit\_type: Preventive skin screening
- bring: []
- questions: ['How often should I have skin checks?', 'What sun protection do you recommend for my skin type?']

## Medical Disclaimer

This AI screening is for educational purposes only and is NOT a medical diagnosis.  
Only a board-certified dermatologist can diagnose skin cancer through clinical examination and biopsy.  
When in doubt, always seek professional care.
